## Project

- **Online Voting System**  
 <https://batchit-lub2.onrender.com/>  
A full-stack web application for managing digital elections with separate Admin and Voter portals. Admins can schedule elections, manage candidates, and publish results, while voters can register, log in, and cast a vote within the configured time window. The system displays live results with vote counts, percentages, and rankings.
- **Technology: PHP, HTML, CSS, Tailwind CSS, JS, MYSQL (Database)**
- **JeevanPravaah – Smart Blood Bank Management System** - Ongoing Project  
 <https://batchit-lub2.onrender.com/>  
Developed a web-based blood bank management system designed to streamline blood donation, storage, and distribution processes. The system allows users to register as donors, request blood, and track availability in real time. It also provides an admin dashboard to manage donors, blood inventories, hospitals, and emergency requests efficiently.
